

SYSTEM 40 MECH CONCEALED FRAME

[COLLECTION SYSTEM MECHANICAL CONCEALED FRAME 40](#)

PRODUCT CODE:

K97-524

Product description

WC concealed system for dry installation features a durable and compact design with a narrow frame width of only **41 cm**, ensuring long-term and trouble-free use.

The frame is constructed from **40 × 40 mm powder-coated steel profiles**, providing high stability and durability.

The system is equipped with **mechanical flushing** and allows **adjustment of flush-water pressure** on the flushing valve for optimal performance.

Installation is simplified thanks to features such as **rotatable painted feet with 4 mounting positions**, **adjustable wall brackets**, and a **4-stage adjustable outlet elbow** that can be directed sideways or downwards.

Additional convenience is provided by a **brake in the frame feet**, **color-coded components**, and **front flush button installation**.

The system includes a **silent filling valve with a plastic connection tip** and a **serviceable angular shut-off valve**, ensuring quiet and reliable operation.

The **FRESH SYSTEM** is included, supporting improved hygiene through the use of freshening tablets.

The cistern allows **2-point water connection** (top right or top left) and supports a **dual-flush system**: 2/4 L, 3/5 L (factory settings), or 3/6 L.

A **wide range of compatible flush buttons** is available to match different interior styles.

The product is covered by a **10-year warranty on the frame and tank**, a **5-year warranty on valves and mechanisms**, and a **25-year guarantee of spare parts availability**.

Unified Water Label

Highest water-saving standards with CERSANIT VORTEX

AQUA concealed cisterns and CERSANIT VORTEX toilet WC bowls have received the highest efficiency rating from the independent organization [Unified Water Label](#), which evaluates the efficiency of bathroom products. The "green" rating guarantees that the products meet the **highest market standards in terms of water saving** – the amount of water needed to flush the toilet has been minimized while maintaining full functionality. The economical CERSANIT VORTEX flushing system ensures maximum efficiency with minimal water consumption. Thanks to the small flush option, with a ratio of 3 small flushes to 1 full flush, the **average water consumption is just 2.5 litres per flush** – this calculation has been verified by the **Water Label certification**. This represents significant savings for your wallet and the environment – we effectively reduce the negative impact on the planet and help generate real financial savings.
